

National Cancer Patient Experience Programme 2010 National Survey

Heatherwood and Wexham Park Hospitals NHS Foundation Trust

Published January 2011

The National Cancer Patient Experience Survey Programme is being undertaken by Quality Health on behalf of the Department of Health

Introduction

The Cancer Reform Strategy (CRS) published in 2007 set out a commitment to establish a new NHS Cancer Patient Experience Survey programme. The 2010 National Cancer Patient Experience Survey was designed to monitor national progress on cancer care; and to provide information that could be used to drive local quality improvements; and to help gather vital information on the *Transforming Inpatient Care* Programme, the *National Cancer Survivorship* Initiative and the *National Cancer Equality* Initiatives.

Participating Trusts

158 acute hospital NHS Trusts providing cancer services took part in the survey. Primary Care Trusts, some of whom provide cancer services, were excluded from the survey, as were some specialist hospital Trusts because of very low patient numbers.

Patients selected to take part

The survey included all adult patients (aged 16 and over) with a primary diagnosis of cancer who had been admitted to an NHS hospital as an inpatient or as a day case patient, and had been discharged between 1st January 2010 and 31st March 2010.

Patients eligible for the survey were taken from Trust patient administration systems; the inclusion criteria were that the patient had an International Classification of Disease (ICD10) code of C00-99 (excluding C44) or D05. The types of cancer patients included in the 2010 survey included, for the first time, significant numbers with rarer cancers as well as patients in the "Big 4" cancer groups – i.e. breast, prostate, lung, and colorectal/Lower GI.

Trust samples were checked rigorously for duplicates and patient lists were also deduplicated nationally to ensure that patients did not receive multiple copies of the questionnaire.

Survey method

Postal surveys were sent to patients' home addresses following their discharge. Up to two reminders were sent to non-responders. A freepost envelope was included for their replies. Patients could call a free telephone line to ask questions, complete the questionnaire verbally, or to access an interpreting service.

Response rate

A total of 109,477 patients who had received treatment for cancer during January to March 2010 were included in the national sample for the Cancer Patient Experience Survey. These patients fell into 13 different cancer groups.

81 eligible patients from this Trust were sent a survey, and 45 questionnaires were returned completed. This represents a response rate of 59% once deceased patients and questionnaires returned undelivered had been accounted for. The national response rate was 67% (67,713 respondents).

Percentage scores

The questions in the cancer survey have been summarised as the percentage of patients who reported a positive experience. For example, "Percentage of patients who were given a complete explanation of their diagnostic tests" and "Percentage of patients who said that nurses did NOT talk in front of them as if they were not there". Neutral responses, such as "Don't know" and "I did not need an explanation" are not included in the denominator when computing the score.

The higher the score, the better the Trust's performance.

Trusts with small numbers of respondents or small numbers in particular tumour groups

Some Trusts have relatively small numbers of cancer patients, so the total number of respondents to the survey may be low despite the high response rate. Reports for these Trusts have been completed in the normal way, but the results for these Trusts need to be treated with caution. It is important to recognise however, that the low numbers of respondents in these Trusts is simply the result of low numbers of cancer patients being treated.

In almost all Trusts, there were tumour groups where the number of respondents was less than 20; this is particularly true of tumour groups representing rarer cancers. Where numbers of respondents in a particular tumour group is less than 20, we have used the convention of leaving the relevant cell blank. This is further explained in the introduction to the tumour group tables in this report.

Benchmark charts

Percentage scores are displayed on benchmark bar charts in the following section. Each bar represents the range of results across all Trusts that took part in the survey for one question. The bar is divided into:

- a red section: scores for the lowest-scoring 20% of Trusts
- a green section: scores for the highest-scoring 20% of Trusts
- an amber section: scores for the remaining 60% of Trusts.

The black circle represents the score for this Trust. For example, if the circle is in the green section of the bar, it means that the Trust is among the top 20% of Trusts in England for that question. The line on either side of the circle shows the 95% confidence interval (the amount of uncertainty surrounding the Trust's score).

National Cancer Patient Experience Survey 2010 Heatherwood and Wexham Park Hospitals NHS Foundation Trust

The table below each benchmarking chart represents the Trust score for each question in the first column (represented by the black circle on the benchmarking chart). The confidence intervals in columns two and three are shown on the chart as the black line running through the Trust score. The fourth and fifth columns represent the upper threshold for the lowest scoring 20% and the lower threshold for the highest scoring 20% (i.e. the end of the red section and the beginning of the green section on the chart). The sixth column displays the highest Trust's score for this question and the seventh column displays the number of respondents who gave this answer for this question. The eighth column displays a '+' alongside any question where the Trust's score falls within the lowest 20% of Trust scores for that question.

Further information

Full details of the survey method are in the National Report of the Cancer Patient Experience Survey 2010, which is available at www.quality-health.co.uk; and further details of survey development, nationally agreed methodology, and cognitive testing are also available at www.quality-health.co.uk.

Who responded to the survey at this Trust?

45 patients responded to the survey from the Trust. The tables below show the numbers of patients from each tumour group and the age and sex distribution of these patients.

Respondents by tumour group

Tumour Group	Number of respondents*
Breast	11
Colorectal / Lower Gastrointestinal	2
Lung	3
Prostate	3
Brain/Central Nervous System	0
Gynaecological	3
Haematological	8
Head and Neck	2
Sarcoma	1
Skin	0
Upper Gastrointestinal	2
Urological	10
Other	0

^{*} These figures will not match the numerator for all questions in the 'comparisons by tumour group' section of this report because not all questions were answered by all responders.

Age and sex

The survey asked respondents to give their year of birth. This information has been amalgamated into 6 age bands. 1 person did not provide their gender or age. Of the 44 who did, the age and gender distribution for the Trust was as follows:

	16-25	26-35	36-50	51-65	66-75	75+	Missing	Total
Men	0	0	2	4	12	4	2	24
Women	0	2	2	9	2	5	0	20
Total	0	2	4	13	14	9	2	44

Trust results

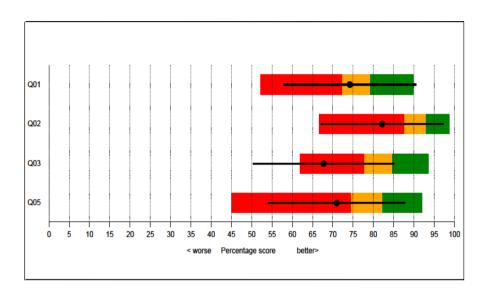

Seeing your GP

Saw GP once/twice before being told had to go to hospital

First appointment no more than 4 weeks after referral

Patient thought they were seen as soon as necessary

Patient's health got better or remained about the same while waiting

Q27	Hospital staff told patient they could get free prescriptions	**	**	**	63%	74%	85%	19	

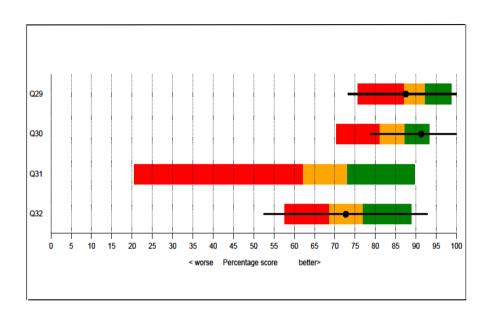

Operations

Admission date not changed by hospital

Staff gave complete explanation of what would be done

Patient given written information about the operation

Staff explained how operation had gone in understandable way

Ques	tion	Percentage for this Trust	Lower 95% confidence interval	Upper 95% confidence interval	Threshold for lowest scoring 20% of all Trusts	Threshold for highest scoring 20% of all Trusts	Highest Trust's percentage score	Number of responders for this Trust	Scored % in lowest 20% of Trusts
Q29	Admission date not changed by hospital	88%	74%	100%	87%	92%	99%	24	
Q30	Staff gave complete explanation of what would be done	91%	80%	100%	81%	87%	93%	23	
Q31	Patient given written information about the operation	**	**	**	62%	73%	91%	19	
Q32	Staff explained how operation had gone in understandable way	73%	54%	91%	69%	77%	89%	22	

Hospital doctors

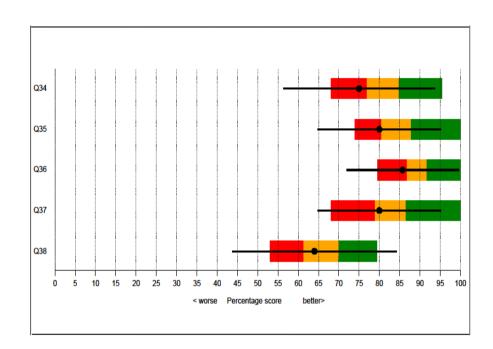

Got understandable answers to important questions all/most of the time

Patient had confidence and trust in all doctors treating them

Patient thought doctors knew enough about how to treat their cancer

Doctors did not talk in front of patient as if they were not there

Patient's family definitely had opportunity to talk to doctor

Quest	ion	Percentage for this Trust	Lower 95% confidence interval	Upper 95% confidence interval	Threshold for lowest scoring 20% of all Trusts	Threshold for highest scoring 20% of all Trusts	Highest Trust's percentage score	Number of responders for this Trust	Scored % in lowest 20% of Trusts
Q34	Got understandable answers to important questions all/most of the time	75%	58%	92%	77%	85%	95%	24	+
Q35	Patient had confidence and trust in all doctors treating them	80%	66%	94%	80%	88%	100%	30	+
Q36	Patient thought doctors knew enough about how to treat their cancer	86%	73%	99%	87%	92%	100%	28	+
Q37	Doctors did not talk in front of patient as if they were not there	80%	66%	94%	79%	86%	100%	30	
Q38	Patient's family definitely had opportunity to talk to doctor	64%	45%	83%	61%	70%	79%	25	

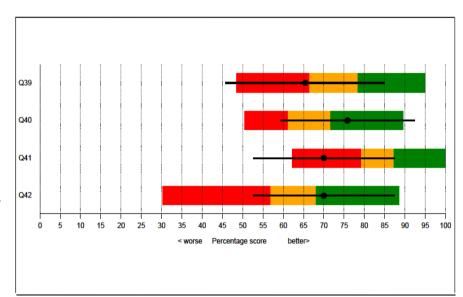

Ward nurses

Got understandable answers to important questions all/most of the time

Patient had confidence and trust in all ward nurses

Nurses did not talk in front of patient as if they were not there

Always / nearly always enough nurses on duty

Questi	on	Percentage for this Trust	Lower 95% confidence interval	Upper 95% confidence interval	Threshold for lowest scoring 20% of all Trusts	Threshold for highest scoring 20% of all Trusts	Highest Trust's percentage score	Number of responders for this Trust	Scored % in lowest 20% of Trusts
Q39	Got understandable answers to important questions all/most of the time	65%	47%	84%	67%	78%	95%	26	+
Q40	Patient had confidence and trust in all ward nurses	76%	60%	91%	61%	72%	90%	29	
Q41	Nurses did not talk in front of patient as if they were not there	70%	54%	86%	79%	87%	100%	30	+
Q42	Always / nearly always enough nurses on duty	70%	54%	86%	57%	68%	89%	30	

Hospital care and treatment

Patient did not think hospital staff deliberately misinformed them

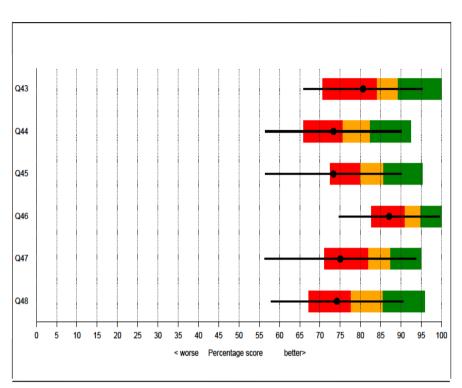

Patient never thought they were given conflicting information

Always given enough privacy when discussing condition or treatment

Always given enough privacy when being examined or treated

Hospital staff did everything to help control pain all of the time

Always treated with respect and dignity by staff

Quest	ion	Percentage for this Trust	Lower 95% confidence interval	Upper 95% confidence interval	Threshold for lowest scoring 20% of all Trusts	Threshold for highest scoring 20% of all Trusts	Highest Trust's percentage score	Number of responders for this Trust	Scored % in lowest 20% of Trusts
Q43	Patient did not think hospital staff deliberately misinformed them	81%	67%	95%	84%	89%	100%	31	+
Q44	Patient never thought they were given conflicting information	73%	58%	89%	76%	82%	92%	30	+
Q45	Always given enough privacy when discussing condition or treatment	73%	58%	89%	80%	86%	95%	30	+
Q46	Always given enough privacy when being examined or treated	87%	75%	99%	91%	95%	100%	31	+
Q47	Hospital staff did everything to help control pain all of the time	75%	58%	92%	82%	87%	95%	24	+
Q48	Always treated with respect and dignity by staff	74%	59%	90%	78%	86%	96%	31	+

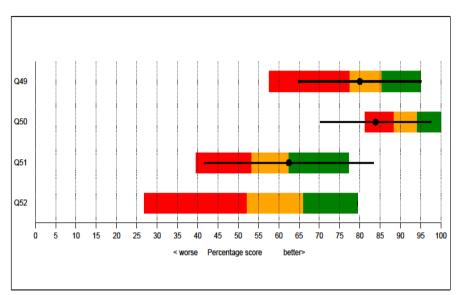

Information given to you before leaving hospital and home support

Given clear written information about what should / should not do post discharge

Staff told patient who to contact if worried post discharge

Family definitely given all information needed to help care at home

Patient definitely given enough care from health or social services

Questi	ion	Percentage for this Trust	Lower 95% confidence interval	Upper 95% confidence interval	Threshold for lowest scoring 20% of all Trusts	Threshold for highest scoring 20% of all Trusts	Highest Trust's percentage score	Number of responders for this Trust	Scored % in lowest 20% of Trusts
Q49	Given clear written information about what should / should not do post discharge	80%	66%	94%	78%	85%	95%	30	
Q50	Staff told patient who to contact if worried post discharge	84%	71%	97%	89%	94%	100%	31	+
Q51	Family definitely given all information needed to help care at home	63%	43%	82%	53%	62%	77%	24	
Q52	Patient definitely given enough care from health or social services	**	**	**	52%	66%	80%	12	

Hospital care as a day patient / outpatient

Staff definitely did everything to control side effects of radiotherapy

Staff definitely did everything to control side effects of chemotherapy

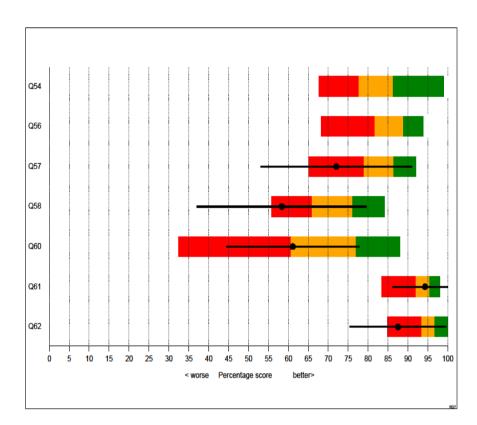

Staff definitely did everything they could to help control pain

Hospital staff definitely gave patient enough emotional support

Waited no longer than 30 minutes for OPD appointment to start

Patient thought doctor spent about the right amount of time with them

Doctor had the right notes and other documentation with them

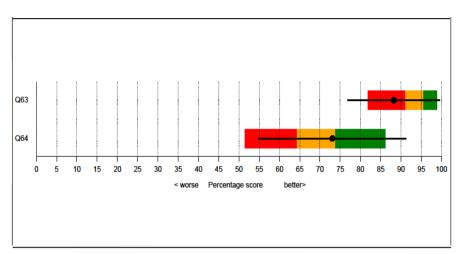

Questi	ion	Percentage for this Trust	Lower 95% confidence interval	Upper 95% confidence interval	Threshold for lowest scoring 20% of all Trusts	Threshold for highest scoring 20% of all Trusts	Highest Trust's percentage score	Number of responders for this Trust	Scored % in lowest 20% of Trusts

National Cancer Patient Experience Survey 2010 Heatherwood and Wexham Park Hospitals NHS Foundation Trust

The National Cancer Patient Experience Survey was undertaken by Quality Health, which specialises in measuring patients' experiences of hospital, primary care and mental health services, using this information to improve the quality of health care and the responsiveness of health services to patients and service users' needs.

Quality Health works with all acute hospitals in England, all independent providers of hospital care, and all Health Boards in Scotland using rigorous survey methods to evaluate the quality of services to patients, the outcomes of operative procedures and health gain, and establish the views of NHS staff. Quality Health also works for healthcare system providers in the Middle East and in Wales and Northern Ireland.

Quality Health is an approved contractor for the Care Quality Commission survey programmes of patients and staff in the NHS and also undertakes data collection and survey systems for the National Patient Reported Outcomes programme on behalf of the Department of Health. Quality Health has headquarters in North Derbyshire.

Further information on the National Cancer Patient Experience Survey programme and the 2010 survey can be obtained at www.quality-health.co.uk
