

National Cancer Patient Experience Programme

2010 National Survey

Oxford Radcliffe Hospitals NHS Trust

Published January 2011

The National Cancer Patient Experience Survey Programme is being undertaken by Quality Health on behalf of the Department of Health

Introduction

The Cancer Reform Strategy (CRS) published in 2007 set out a commitment to establish a new NHS Cancer Patient Experience Survey programme. The 2010 National Cancer Patient Experience Survey was designed to monitor national progress on cancer care; and to provide information that could be used to drive local quality improvements; and to help gather vital information on the *Transforming Inpatient Care Programme*, the *National Cancer Survivorship Initiative* and the *National Cancer Equality Initiatives*.

Participating Trusts

158 acute hospital NHS Trusts providing cancer services took part in the survey. Primary Care Trusts, some of whom provide cancer services, were excluded from the survey, as were some specialist hospital Trusts because of very low patient numbers.

Patients selected to take part

The survey included all adult patients (aged 16 and over) with a primary diagnosis of cancer who had been admitted to an NHS hospital as an inpatient or as a day case patient, and had been discharged between 1st January 2010 and 31st March 2010.

Patients eligible for the survey were taken from Trust patient administration systems; the inclusion criteria were that the patient had an International Classification of Disease (ICD10) code of C00-99 (excluding C44) or D05. The types of cancer patients included in the 2010 survey included, for the first time, significant numbers with rarer cancers as well as patients in the “Big 4” cancer groups – i.e. breast, prostate, lung, and colorectal/Lower GI.

Trust samples were checked rigorously for duplicates and patient lists were also de-duplicated nationally to ensure that patients did not receive multiple copies of the questionnaire.

Survey method

Postal surveys were sent to patients' home addresses following their discharge. Up to two reminders were sent to non-responders. A freepost envelope was included for their replies. Patients could call a free telephone line to ask questions, complete the questionnaire verbally, or to access an interpreting service.

Response rate

A total of 109,477 patients who had received treatment for cancer during January to March 2010 were included in the national sample for the Cancer Patient Experience Survey. These patients fell into 13 different cancer groups.

1712 eligible patients from this Trust were sent a survey, and 1076 questionnaires were returned completed. This represents a response rate of 66% once deceased patients and

questionnaires returned undelivered had been accounted for. The national response rate was 67% (67,713 respondents).

Percentage scores

The questions in the cancer survey have been summarised as the percentage of patients who reported a positive experience. For example, “Percentage of patients who were given a complete explanation of their diagnostic tests” and “Percentage of patients who said that nurses did NOT talk in front of them as if they were not there”. Neutral responses, such as “Don’t know” and “I did not need an explanation” are not included in the denominator when computing the score.

The higher the score, the better the Trust’s performance.

Trusts with small numbers of respondents or small numbers in particular tumour groups

Some Trusts have relatively small numbers of cancer patients, so the total number of respondents to the survey may be low despite the high response rate. Reports for these Trusts have been completed in the normal way, but the results for these Trusts need to be treated with caution. It is important to recognise however, that the low numbers of respondents in these Trusts is simply the result of low numbers of cancer patients being treated.

In almost all Trusts, there were tumour groups where the number of respondents was less than 20; this is particularly true of tumour groups representing rarer cancers. Where numbers of respondents in a particular tumour group is less than 20, we have used the convention of leaving the relevant cell blank. This is further explained in the introduction to the tumour group tables in this report.

Benchmark charts

Percentage scores are displayed on benchmark bar charts in the following section. Each bar represents the range of results across all Trusts that took part in the survey for one question. The bar is divided into:

- a red section: scores for the lowest-scoring 20% of Trusts
- a green section: scores for the highest-scoring 20% of Trusts
- an amber section: scores for the remaining 60% of Trusts.

The black circle represents the score for this Trust. For example, if the circle is in the green section of the bar, it means that the Trust is among the top 20% of Trusts in England for that question. The line on either side of the circle shows the 95% confidence interval (the amount of uncertainty surrounding the Trust’s score).

National Cancer Patient Experience Survey 2010 Oxford Radcliffe Hospitals NHS Trust

The table below each benchmarking chart represents the Trust score for each question in the first column (represented by the black circle on the benchmarking chart). The confidence intervals in columns two and three are shown on the chart as the black line running through the Trust score. The fourth and fifth columns represent the upper threshold for the lowest scoring 20% and the lower threshold for the highest scoring 20% (i.e. the end of the red section and the beginning of the green section on the chart). The sixth column displays the highest Trust's score for this question and the seventh column displays the number of respondents who gave this answer for this question. The eighth column displays a '+' alongside any question where the Trust's score falls within the lowest 20% of Trust scores for that question.

Further information

Full details of the survey method are in the National Report of the Cancer Patient Experience Survey 2010, which is available at www.quality-health.co.uk; and further details of survey development, nationally agreed methodology, and cognitive testing are also available at www.quality-health.co.uk.

Who responded to the survey at this Trust?

1076 patients responded to the survey from the Trust. The tables below show the numbers of patients from each tumour group and the age and sex distribution of these patients.

Respondents by tumour group

Tumour Group	Number of respondents*
Breast	180
Colorectal / Lower Gastrointestinal	155
Lung	69
Prostate	45
Brain/Central Nervous System	64
Gynaecological	81
Haematological	124
Head and Neck	57
Sarcoma	17
Skin	44
Upper Gastrointestinal	69
Urological	167
Other	4

* These figures will not match the numerator for all questions in the 'comparisons by tumour group' section of this report because not all questions were answered by all responders.

Age and sex

The survey asked respondents to give their year of birth. This information has been amalgamated into 6 age bands. 37 people did not provide their gender or age. Of the 1039 who did, the age and gender distribution for the Trust was as follows:

	16-25	26-35	36-50	51-65	66-75	75+	Missing	Total
Men	7	7	47	142	168	106	11	488
Women	9	19	87	218	132	75	11	551
Total	16	26	134	360	300	181	22	1039

Trust results

Seeing your GP

Saw GP once/twice before being told had to go to hospital

First appointment no more than 4 weeks after referral

Patient thought they were seen as soon as necessary

Patient's health got better or remained about the same while waiting

Question	Percentage for this Trust	Lower 95% confidence interval	Upper 95% confidence interval	Threshold for lowest scoring 20% of all Trusts	Threshold for highest scoring 20% of all Trusts	Highest Trust's percentage score	Number of responders for this Trust	Scored % in lowest 20% of Trusts

Q27	64%	59%	68%	63%	74%	85%	496	

Operations

Admission date not changed by hospital

Staff gave complete explanation of what would be done

Patient given written information about the operation

Staff explained how operation had gone in understandable way

Question	Percentage for this Trust	Lower 95% confidence interval	Upper 95% confidence interval	Threshold for lowest scoring 20% of all Trusts	Threshold for highest scoring 20% of all Trusts	Highest Trust's percentage score	Number of responders for this Trust	Scored % in lowest 20% of Trusts
Q29	84%	81%	87%	87%	92%	99%	658	+
Q30	87%	84%	90%	81%	87%	93%	654	
Q31	70%	66%	73%	62%	73%	91%	601	
Q32	75%	72%	79%	69%	77%	89%	651	

Hospital doctors

Got understandable answers to important questions all/most of the time

Patient had confidence and trust in all doctors treating them

Patient thought doctors knew enough about how to treat their cancer

Doctors did not talk in front of patient as if they were not there

Patient's family definitely had opportunity to talk to doctor

Question		Percentage for this Trust	Lower 95% confidence interval	Upper 95% confidence interval	Threshold for lowest scoring 20% of all Trusts	Threshold for highest scoring 20% of all Trusts	Highest Trust's percentage score	Number of responders for this Trust	Scored % in lowest 20% of Trusts
Q34	Got understandable answers to important questions all/most of the time	82%	79%	85%	77%	85%	95%	761	
Q35	Patient had confidence and trust in all doctors treating them	83%	81%	86%	80%	88%	100%	811	
Q36	Patient thought doctors knew enough about how to treat their cancer	89%	87%	91%	87%	92%	100%	806	
Q37	Doctors did not talk in front of patient as if they were not there	84%	81%	86%	79%	86%	100%	813	
Q38	Patient's family definitely had opportunity to talk to doctor	63%	60%	67%	61%	70%	79%	713	

Ward nurses

- Got understandable answers to important questions all/most of the time
- Patient had confidence and trust in all ward nurses
- Nurses did not talk in front of patient as if they were not there
- Always / nearly always enough nurses on duty

Question	Percentage for this Trust	Lower 95% confidence interval	Upper 95% confidence interval	Threshold for lowest scoring 20% of all Trusts	Threshold for highest scoring 20% of all Trusts	Highest Trust's percentage score	Number of responders for this Trust	Scored % in lowest 20% of Trusts
Q39	77%	74%	80%	67%	78%	95%	743	
Q40	68%	65%	71%	61%	72%	90%	819	
Q41	87%	85%	90%	79%	87%	100%	816	
Q42	67%	64%	71%	57%	68%	89%	817	

Hospital care and treatment

Q43 Patient did not think hospital staff deliberately misled them

Q44 Patient never thought they were given conflicting information

Q45 Always given enough privacy when discussing condition or treatment

Q46 Always given enough privacy when being examined or treated

Q47 Hospital staff did everything to help control pain all of the time

Q48 Always treated with respect and dignity by staff

Question	Percentage for this Trust	Lower 95% confidence interval	Upper 95% confidence interval	Threshold for lowest scoring 20% of all Trusts	Threshold for highest scoring 20% of all Trusts	Highest Trust's percentage score	Number of responders for this Trust	Scored % in lowest 20% of Trusts
Q43	89%	87%	91%	84%	89%	100%	821	
Q44	76%	73%	79%	76%	82%	92%	822	
Q45	82%	80%	85%	80%	86%	95%	821	
Q46	94%	92%	96%	91%	95%	100%	815	
Q47	88%	86%	90%	82%	87%	95%	698	
Q48	83%	80%	86%	78%	86%	96%	817	

Information given to you before leaving hospital and home support

- Given clear written information about what should / should not do post discharge
- Staff told patient who to contact if worried post discharge
- Family definitely given all information needed to help care at home
- Patient definitely given enough care from health or social services

Question	Percentage for this Trust	Lower 95% confidence interval	Upper 95% confidence interval	Threshold for lowest scoring 20% of all Trusts	Threshold for highest scoring 20% of all Trusts	Highest Trust's percentage score	Number of responders for this Trust	Scored % in lowest 20% of Trusts
Q49	84%	82%	87%	78%	85%	95%	780	
Q50	93%	91%	95%	89%	94%	100%	785	
Q51	59%	55%	62%	53%	62%	77%	673	
Q52	65%	60%	70%	52%	66%	80%	369	

Hospital care as a day patient / outpatient

Staff definitely did everything to control side effects of radiotherapy

Staff definitely did everything to control side effects of chemotherapy

Staff definitely did everything they could to help control pain

Hospital staff definitely gave patient enough emotional support

Waited no longer than 30 minutes for OPD appointment to start

Patient thought doctor spent about the right amount of time with them

Doctor had the right notes and other documentation with them

Question	Percentage for this Trust	Lower 95% confidence interval	Upper 95% confidence interval	Threshold for lowest scoring 20% of all Trusts	Threshold for highest scoring 20% of all Trusts	Highest Trust's percentage score	Number of responders for this Trust	Scored % in lowest 20% of Trusts
Q54	84%	79%	88%	78%	86%	100%	263	
Q56	83%	80%	87%	82%	89%	95%	545	
Q57	83%	80%	86%	79%	86%	92%	616	
Q58	69%	66%	73%	66%	76%	84%	727	
Q60	68%	65%	71%	61%	77%	88%	927	
Q61	95%	94%	97%	92%	95%	98%	941	
Q62	94%	92%	96%	93%	97%	100%	917	

Care from your general practice

Q63 GP given enough information about patient's condition and treatment

Q64 Practice staff definitely did everything they could to support patient

Question	Percentage for this Trust	Lower 95% confidence interval	Upper 95% confidence interval	Threshold for lowest scoring 20% of all Trusts	Threshold for highest scoring 20% of all Trusts	Highest Trust's percentage score	Number of responders for this Trust	Scored % in lowest 20% of Trusts

The National Cancer Patient Experience Survey was undertaken by Quality Health, which specialises in measuring patients' experiences of hospital, primary care and mental health services, using this information to improve the quality of health care and the responsiveness of health services to patients and service users' needs.

Quality Health works with all acute hospitals in England, all independent providers of hospital care, and all Health Boards in Scotland using rigorous survey methods to evaluate the quality of services to patients, the outcomes of operative procedures and health gain, and establish the views of NHS staff. Quality Health also works for healthcare system providers in the Middle East and in Wales and Northern Ireland.

Quality Health is an approved contractor for the Care Quality Commission survey programmes of patients and staff in the NHS and also undertakes data collection and survey systems for the National Patient Reported Outcomes programme on behalf of the Department of Health. Quality Health has headquarters in North Derbyshire.

Further information on the National Cancer Patient Experience Survey programme and the 2010 survey can be obtained at www.quality-health.co.uk
